

VEMALATHITHAN SARAVANAN

INFORMATION TECHNOLOGY

Dear Hiring Manager

I am writing to express my interest in joining your team in an IT support or entry-level cybersecurity/networking role. I hold a Diploma in Computer Networking Technology and EC-Council certifications in ethical hacking, network defense, and security fundamentals (CEH, CND, ECSS), along with Cisco Networking Academy training in networking, Linux, and cybersecurity essentials.

During my internship as an IT Support Intern / Administrative Assistant at SJK(T) Pusat Telok Datok, I handled first-level troubleshooting for staff, including software issues, login and account assistance, computer setup, and Windows installation support. I also carried out network checks and internet diagnostics, and maintained system documentation and records giving me practical, hands-on exposure to real IT support operations.

To strengthen my security skills beyond coursework, I built a network incident detection project using Splunk SIEM configuring log ingestion, building monitoring dashboards, and setting up real-time alerts for suspicious activity. This, combined with prior experience in manufacturing operations and retail, has given me a solid mix of technical troubleshooting ability, attention to detail, and adaptability across different work environments.

I am a fast learner who works well under deadlines and enjoys solving technical problems. I would welcome the opportunity to bring this background to your organization and am available to start immediately.

Thank you for your time and consideration. I have attached my resume and would be glad to discuss my application further.

Kind regards,

Vemalathithan A/L Saravanan
